**GME APOLLO PROGRAM**

## DO DIAMOND HANDS WORK IN ZERO GRAVITY?

Yes. In fact, when diamond hands have been properly polished and hardened for long periods of time, they can function even more efficiently in the zero gravity environment. For the last several months, many apes have been training their diamond hands to withstand the temptations of selling before the peak. Once lift off begins and the rocket has left for its journey to the moon, diamond hand training will truly be put to the test. Take your protein pills and put your helmet on because the admiral of the galactic fleet told you to buckle up.

## Go / No-Go for Launch

The launch checklist by **u/stevetheimpact** is complete and we are cleared by the tower for lift off. Three new rules were filed relating to confidential information, market disruption events, and systems disconnects. We are awaiting further readings but all systems are still nominal and we are a go for launch.
